# Overview

- **Preparing to build from source code**
  - Building worksheet objects from code
  - Theme support
  - Resources
- **Exporting applications to Source**
  - Project structure
- **Building applications from Source**
  - Build sequence

# Preparing to Build from Source Code

# **Northwind Workbook**

# Supporting Data

# **Format Worksheets**

# FormatSheetX

# Exporting Applications to Source

# Visual SourceSafe

# VBA Tools

# Building Applications from Source

# Build Sequence

# **Add/Delete Sheets**

# **Add Resources**

# Summary

- Using a version control system requires more code in the application
- A folder structure must be created in the version control system
- A build sequence must be followed to ensure a correct build
- After testing, approved files are checked in
